PROFESSIONAL SUMMARY

Dedicated and passionate software development student with eight (8) plus years of successful experience working for international companies. Being promoted to Project Manager which allowed me to collect and develop more valuable experience for managing and deploying projects.

Recognizing my interest in software development, I elected to take a leave from the workforce in order to go back to school for upgrading my skills. Enjoying to be challenged and engaging with software development that requires me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me.
